## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 15, 23 and 30 are objected to because of the following informalities:  
These claims have alkyl, and hydroxyl alkyl listed twice in the definition of R2 and R3.  
Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 6-11, 13, 15-22, 34, 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15 teaches "an effective amount of one cationic surfactant", without teaching what such is effective to accomplish.

Claim 11 depends upon cancelled claim 1.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1712

5. Claims 23, 24, 30 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 94/17154.

WO '154 teaches a method of removing particles from a wellbore, such as in a drilling method, which comprises using a surfactant within the scope of the present invention (see the compound at page 10, lines 20-25). The composition comprises a fatty acid or salt (claim 4), and an acid such as sulfuric or hydrochloric acid is added at various points of use, which supply the anion X (page 7, lines 23-31). Such would clearly reduce friction as in claim 30. The present invention is thus anticipated by WO '154.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1712

7. Claims 31-33, 36 and 39 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4, 12 and 13 of copending Application No. 11/701353. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of 11/701353 do not specify the amount of salt or surfactant, it would be obvious to one of ordinary skill to vary the concentrations thereof, in order to obtain optimum fluids for various well treatments.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claim 35 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Applicant's amendment is noted, which overcomes the previous objections. New rejections are presented in this action.
